## The First Multichain DAO

### About NextDream

NextDream is the first multi-chain, multi-product DAO that allows dreamers to design their own blockchain journey. NextDream is an umbrella organization for all the NextDream platforms. It is an ever-evolving structure, built and endorsed by an expert team, which paves the way for the creation of new WEB 3.0 products. The journey starts with four major base Dapps to support and empower dreamers who wish to unleash their true powers. We aim to be the world's first decentralized Multichain, Multi-Token, Multi-DEX, Multi-Verse WEB 3.0 Dapps organization that offers endless support for all solutions, across all playgrounds.

### Background

Despite the flux, the one true aim of technology has always remained simple: Create a solid foundation for the empowerment of humanity through solutions that make life easier. However, when current technologies, 3D parties, or intermediaries are put to practice, we often lose the source of truth, transparency, and reliability because of their centralized nature.

In NextDream, we genuinely believe in the power of Blockchain technology and the philosophy of Satoshi Nakamoto, both of which have fundamentally changed the world. What has set us on this path is our belief and our trust in this ecosystem. The first stop of this journey is to create an end-to-end Dapps in the WEB 3.0 world and give the power back to the communities that have the desire and the capacity to generate future-shaping ideas.

NextDream gives life to paramount solutions. This way, it encourages all dreamers to grow even stronger and formulate their own creations and ideas to contribute to the ecosystem. NextDream's network is limitless — comprising brands, individuals, creators, artists, and entrepreneurs who imagine a better world without losing sight of the core values of transparency, trust, and reliability.

# “Many Chains, One Platform & Most Inclusive Technology Infrastructure”

## Philosophy

We are creating well-built portals that offer endless opportunities to take you on a journey like never before. Enter the multi-dimensional universe and start your odyssey on WEB 3.0.

Welcome to a peer-centric universe where everyone feels welcomed. We know you have it in you. Boost your self-trust through innovation. Create and contribute in safe spaces where peers can collectively better themselves. Here, you will witness an unforgettable user experience — optimized just for you.

## Who is it for?

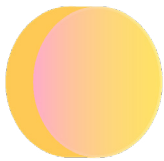

NextDream offers its unique services to a wide range of businesses (B2B & B2C) and aspires to bring them to the next level.

- Retailers
- Enterprises
- Musicians
- Game Studios
- Artists
- Celebrities
- Charities
- Entertainment
- Gamers
- Athletes
- Sport Clubs
- Influencer
- Events

# NextDream Platforms

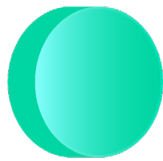

NextDream is a full-stack ecosystem that consists of different portals. Each special portal has unique services and “blockchain journey designs” of its own. NextDream platforms are powered by a native token that offers premium advantages.

## NextRabbit

Follow the NextRabbit to have early access to the best new projects

Launchpad

## NextPlanet

Make this planet your home to create, buy, sell, auction, and discover NFT's

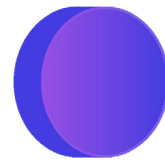

Marketplace

## NextChange

Leverage your journey and boost your wealth

DEXchange

## NextModern

Transcend what's next and see beyond

Metaverse

Here, you will find the next big launchpad project powered by innovation and brilliance. NextRabbit is supported by our industry-leading experts to bring prosperity and abundance to the communities. NextRabbit includes exclusive projects for different industries — from blockchain to gaming, from real estate to energy, and even charity... Simply diversified by quality.

NextRabbit is a multi-chain launchpad that leverages the next big project for the community. Thanks to NextRabbit, Dapps will be able to raise capital with agility and low costs. This multi-chain support is crucial to ensure that all communities feel welcomed and empowered enough to give forth their power to the launchpad and get back added power in return.

NextRabbit is a permissionless listing platform that includes private pools, has whitelisting, and KYC solutions. Dapps from any industry or token creator can utilize their own tokens on NextRabbit with complete freedom and opportunities to maximize their potential and create value for their projects and crypto currencies.

NextRabbit gives back to its own ecosystem, partners, and emerging industries, all while it leverages from the projects it holds. It is all about including communities and generating opportunities for them to contribute to standout Dapps. With the power that the NextDream ecosystem holds, we are here to build the next Dapps for gaming, Metaverse, clean energy, and much more.

**“Give back to the dreamers what they  
want to build.  
Be the Next Entrepreneur.”**

**“NextPlanet is your new home.  
Be the Next Creator & Collector &  
Supporter”**

NextPlanet is our NFT marketplace that offers a fully accessible and attractive platform to discover, create, buy, and sell exclusive digital assets.

The NFT itself carries a strong value in both real and digital life. NFTs can be very niche and NFT marketplaces can represent various assets like art, music, property, digital art, games, etc.

The idea behind NextPlanet is to create the ultimate solution for all industries. The all-encompassing approach of NextPlanet allows a wide range of companies, individuals, and customizable smart contracts. Our goal is to bring all EVM compatible chains together to enrich our platform and the communities it hosts. We are aware that the existing solutions only address a fraction of the blockchain and the contracts. NextPlanet distinguishes itself by expanding this scope to encompass all EVM compatible solutions. We are starting with Ethereum, Binance Smart Chain, Polygon, Avalanche, and Solana. Many more are going to be included throughout our roadmap.

NextPlanet is meticulous with both its blockchain philosophy and its value-creation focused nature. NextPlanet's door is always open to those who create, collect, and contribute to the ecosystem in one way or another. NextPlanet is the best place to build and foster communities and cultures. We have confidence in what NFTs represent and believe that they are here to stay. Here, creators will get what they truly deserve, and they will have the time to focus on creating more for the future.

We give back the control that is rightfully yours and call together the brands who are ready for a shared economy in the WEB 3.0 world. Additionally, NextPlanet hosts a variety of premium partners who are ready to share their value with the community.

**“NextPlanet democratizes,  
unites, and elevates.  
We give back to the creators of all  
sorts- the true owners.”**

### **Why NextPlanet?**

NextPlanet is the first NFT ecosystem that allows dreamers to create their contracts however they like. Create special collections or be a part of promising new projects, you have our full support either way.

We are also introducing different visionary brands that want to contribute a portion of their revenues to the originative communities and individuals.

The inclusive nature of NextPlanet contains a wide range of companies, individuals, and customizable smart contracts. We are trying to bring all EVM compatible chains and communities to our platform so they can flourish.

We are aware that creating NFTs is an expensive process. Creators often have to strive to find different marketplaces with lower costs and minimum gas fees in order to be able to reach out to their audiences. What we bring to the table is offering unique chains that enable creators to sell their assets at low fees while keeping our commission fees exceptionally low.

NextPlanet also secures its buyers, sellers, and all stakeholders with secure blockchain solutions that consist of robust AML/CTF features.

We introduce you to the starting ground for the future of investment and wealth management. Here you can leverage your tokens instantly. Managing your crypto portfolio has never been easier.

### **“Be the Next Investor”**

NextChange is an exchange platform, consisting of CEX and DEX to leverage our tokens of the ecosystem and the dreamers, as well as all tokens that aim to be the next big thing in the crypto space. No listing fees.

NextChange is our long-play to support the blockchain ecosystem by designing a new way of leveraging, investing, and wealth management. All updates regarding NextChange will be announced through our NextDream channels.

Metaverse is an upcoming WEB 3.0 technology. It presents a universe connected by chained flows of creative materials and ideas that transcend imagination and boundaries.

We have started to design NextModern for the trailblazing brands in the retail, music, and gaming industries. NextModern allows them to create the new future of WEB 3.0 where they can go beyond existing realities. NextModern is a metaverse where individuals can gather to engage, contribute, and discover. All updates regarding NextModern will be announced through our NextDream Channels.

### **“Be the Next Citizen”**

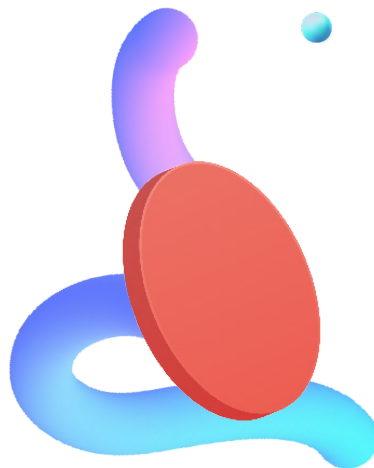

# Our Community

Our community is made up of industry leaders from various sectors who are ready to shape the future and level up their expertise. Now is the time for our NextDream.

NextDream for: Investment, Creation, Contribution, Leverage, Earnings, and Play.

**“Seek more, find more, be more.  
Follow the NextDream and  
transcend the future.”**

# ROADMAP

## Q1

- Launchpad and NFT marketplace design
- Whitepaper finalization
- NextRabbit whitelisting
- NextRabbit token launch
- NextRabbit smart contracts

## Q2: NextRabbit

- Completion of core platform features in NextRabbit
- Staking initiation in NextRabbit
- Onboarding of first collections in NextRabbit

## Q2: NextPlanet

- NextPlanet whitelisting
- NextPlanet token launch
- Launch of NextPlanet with ETH, BSC, MATIC
- Completion of core platform features in NextPlanet
- Onboarding of first collections in NextPlanet

## Q3

- Complete EVM Compatible-blockchain integrations
- Addition of AML/CTF feature to the platforms
- Wallet integrations
- UI/UX advancements
- Onboarding of B2B partners

## Q4

- NextModern whitelisting
- NextModern token launch
- Start of infrastructure developments for Metaverse
